SUMMARY

Dedicated Cybersecurity professional with hands-on experience in Security Operations Center (SOC) processes, including security monitoring, alert triage, and incident response using SIEM tools like Splunk and Microsoft Sentinel. Proficient in analyzing logs, identifying threats, and documenting incidents to enhance organizational security posture. Eager to leverage strong foundational knowledge in networking and systems to contribute to a dynamic security team and advance threat detection capabilities.

EXPERIENCE

SOC Analyst Intern | Cipher Net Innovation & Technology Pvt. Ltd | Hyderabad, India Sep 2025 – Dec 2025

- Monitored and analyzed security alerts using SIEM tools like Splunk and Microsoft Sentinel, effectively detecting and mitigating potential threats.
- Investigated and triaged alerts for DoS attacks, brute force attempts, and phishing incidents, ensuring timely incident response.
- Identified and analyzed Indicators of Compromise (IOCs) such as malicious IPs, domains, and URLs, enhancing threat detection capabilities.
- Performed detailed log analysis from endpoints, network devices, and servers, tracing security events to improve incident response.
- Utilized Wireshark for network traffic analysis, successfully detecting anomalies and potential intrusions.
- Differentiated between false positives and real incidents, escalating confirmed threats to senior analysts for further action.
- Conducted phishing analysis, including email header inspection and malicious link identification, to strengthen organizational security.
- Executed basic threat hunting using known IOCs and abnormal behavior patterns, contributing to proactive security measures.
- Documented incidents, findings, and response actions for comprehensive reporting and future reference, ensuring compliance with security protocols.
- Followed SOC procedures, SOPs, and security best practices during incident handling, maintaining operational integrity.

Cybersecurity and Ethical Hacking Intern (VAPT) | NLIGHN TECH | Hyderabad, India Apr 2025 – Jul 2025

- Conducted manual web application vulnerability assessments following OWASP Top 10, identifying critical security flaws.
- Uncovered vulnerabilities such as SQL Injection, XSS, IDOR, and CSRF, enhancing application security posture.
- Utilized Burp Suite and Nmap to validate findings and eliminate false positives, ensuring accurate vulnerability reporting.
- Assisted in preparing detailed vulnerability assessment reports, outlining risk impact and remediation steps for stakeholders.
- Supported re-testing and vulnerability closure tracking, contributing to overall security improvement efforts.

Cyber Security & Digital Forensics Intern | Cyber Secure India | Remote Apr 2025 – Jul 2025

- Authored and published a technical paper titled 'Understanding the TCP Three-Way Handshake: Mechanism, Purpose, and Security Implications', enhancing academic knowledge in network security.
- Performed manual web application vulnerability assessments, contributing to the organization's security initiatives.

Cybersecurity and Ethical Hacking Intern | CYBERDOSTI | Remote Jan 2024 – Apr 2024

- Led projects focused on creating secure password systems and developing security tools, significantly enhancing system protection.
- Utilized advanced web research techniques to improve security practices during project execution, ensuring comprehensive risk assessments.
- Strengthened problem-solving, time management, and leadership skills, improving project delivery efficiency through effective collaboration.

SKILLS

SOC Operations • Security Monitoring • Alert Triage • Incident Response • Log Analysis • Threat Detection • SIEM Tools • Splunk • Microsoft Sentinel • Elastic SIEM (ELK Stack) • CrowdStrike Falcon • Security Tools • Wireshark • Nmap • Burp Suite • Nessus • Metasploit • Operating Systems • Windows • Linux (Log Analysis & Security Monitoring) • Networking • TCP/IP • DNS • HTTP • SMTP • OSI Model • Threat Knowledge • Malware • phishing email analysis • Brute Force • DoS Attacks • Frameworks • MITRE ATT&CK • Cyber Kill Chain • OWASP TOP 10 • Scripting • Python (Automation & Security Tools) • Incident Documentation • Reporting • Vulnerability Assessment • EDR • IDS/IPS • SIEM Rule Creation • False Positive/Negative Analysis • SQL • Analytical Thinking • Attention to Detail • Communication Skills • Ability to Work Under Pressure • Time Management • Incident Management • Threat Intelligence

PROJECTS

SOC Lab Simulation Project Feb 2026 - Apr 2026

Monitored and triaged security alerts using SIEM tools (Splunk, Microsoft Sentinel, Elastic SIEM).

- Analyzed logs from Windows/Linux systems, AWS CloudTrail, and network devices to detect anomalies.
- Investigated incidents including phishing, malware alerts, and brute-force attacks.
- Performed incident response activities including triage, containment, and escalation.
- Supported endpoint monitoring using EDR concepts (CrowdStrike basics).
- Followed SOPs, runbooks, and escalation procedures in a SOC environment.
- Documented incidents, maintained tickets, and ensured SLA compliance.

DNS Enumeration Tool

May 2025 - May 2026

- Built a tool using Python (dnspython) to retrieve DNS records (A, MX, NS, etc.).
- Implemented error handling for reliable execution.
- Tested on public domains, ensuring robust error handling.
- Used for reconnaissance and identifying potential attack surfaces.

Subdomain Enumeration Tool

May 2026 - May 2026

- Developed a Python-based tool to identify active subdomains.
- Improved data handling and automation skills.
- Saved results to file, streamlining security assessments.

CERTIFICATIONS & TRAINING

SOC Analyst • Cipher Net Innovation & Technology Pvt. Ltd

Cyber Security & Digital Forensics • Cyber Secure India

VAPT • Inlighthtech

Cybersecurity • CyberDosti

EDUCATION

Bachelor of Technology

Jul 2020 - Sep 2023

Guru Nanak Institute of Technology | Hyderabad, India
